

Appl. No. 09/250,027

Response Dated November 12, 2007

Reply to Office Action Dated October 15, 2007

II. In The Specification

Please amend the specification as follows:

Please substitute the following for the paragraph beginning on line 40, page 1:

Computer ~~programs~~ programs that operate with a network often have multiple programs operating concurrently. It is frequently necessary for information, such as events, to be transferred from one program to another, either within a single workstation or across a network of interconnected computer workstations. An operator at one of the workstations may process information by using different programs operating concurrently in the workstation or across the network of workstations. The operator may also retrieve information by using a multiple number of computer programs executing concurrently in the single workstation or across the network of interconnected workstations. It is therefore important that information be quickly and easily transferred between the multiple number of programs operating in the one or more interconnected workstations.
